Homeschool Resources

Introducing Homeschooling Materials and Discovery Kits at the Park Forest Library

Welcome to the Park Forest Library
Homeschool Resources and Discovery Kits.

The Park Forest Library has added a wide range of curriculum materials for children K– 8th Grade. We have assembled 16 kits for use by teachers, homeschoolers, parents and independent learners. All of our resources are designed to enrich curricula and student learning and cover a variety of topics chosen in cooperation with teachers, homeschoolers and parents in the community.

Some resources contain multi-format materials including books, CD's, games and models chosen to appeal to a variety of learning styles and ages.

These resources are designed to meet the needs of elementary and middle school students. We hope you enjoy this new collection located at the end of our Juvenile non-fiction collection in the kids' zone area.

***CHECK OUT our Nature Explore Kits!**
available for IN-HOUSE USE ONLY in kids' zone

What to expect from the Park Forest Library Resources:

check it
out!

- A variety of subjects covered
- Material covering a variety of reading levels
- DVD's and CD's as audiovisual tools
- Games and models for hands-on learning
- Exciting and stimulating content
- Suggested websites and other resources may be included inside materials
- Attractive, secure and easy to transport packaging
- Hands-On kits that explore the world of science through nature

(For In-House Use Only)

Why are these kits helpful?

- Kits can be used to engage in unit studies
- Kits can be used to supplement curricula
- Kits can be used to encourage deeper exploration of a topic
- Kits can be used by classroom teachers, homeschoolers, families, and independent learners
- We have done all the work to ensure that each kit has adequate resources to facilitate a sort of “one stop” shopping opportunity for our patrons.

Nature Explorer Kits

Nature Explorer Kits are designed for student to experience science in a fun an engaging way.

Each kit is Hands-On with a variety of materials that will allow you to discover fun facts and more about nature and the world around it.
